

Holtkötter

Janus H

Struktur

- black
- aluminium
- black / brass

Technical details

Country of Manufacture	 Germany
Manufacturer	Holtkötter
Designer	Holtkötter
Year of design	2024
material	Metall
height adjustment	height adjustable
dimming	trailing edge
Wattage	2 x 18 W
LED #	inclusive
Colour Rendering Index	>90
Luminous flux in lm	5400
Color temperature in Kelvin	2.200 - 2.850
protection	IP20
Scope of delivery	LED
light head dimensions	18 cm
bulb exchange	on site itself
Dimensions	H 99 - 155 cm

Description

The Holtkötter Janus H ceiling lamp has height-adjustable telescopic arms attached to the side of a rectangular ceiling canopy, which can be swivelled by up to 160° using joints. These swivelling telescopic arms make it easy to illuminate even large tables. The lamp heads, which can be continuously rotated and swivelled in all directions and contain a replaceable LED panel, allow the light to be individually directed. When dimmed, the light colour of the integrated LED changes to a warmer tone (from 2,850 Kelvin warm white to 2,200 Kelvin warm white) thanks to dim-to-warm technology. With a light output of 5,400 lumens and a colour rendering index of over 90, the Holtkötter Janus H provides powerful light that can be emitted directly or indirectly as required. The Janus H ceiling lamp is height-adjustable from 99 cm to 155 cm by extending or retracting the telescopic arm. The ceiling canopy is 33 cm long, 6.2 cm wide and 3.6 cm high. The Janus H is available in the following surface textures: matt aluminium, black/brass anodised and black.
