### Description

The Ingo Maurer BakaRú Ceiling Transformer is one component of the BakaRú system lamp. The transformer reduces the 230 volt to 12 volt, being equipped with a thermal fuse. The capacity is at maximum 200 watt. The BakaRú Ceiling Transformer is installed at the ceiling. The 6 metal rods for ceiling mounting are offered as accessories. In addition to this BaKaRú Transformator we also offer the transformer wall from this collection, which allows you to stretch your BaKaRú system light from wall to wall.

This is not a standalone lamp, but part of a lighting system, which must be assembled with other parts.
