## Description

The Oluce Kelly 790 is a wall lamp. The reflector of the Kelly 790 is made of laser-cut metal. The wall plate is painted white, the reflector by Oluce in the surfaces white-lacquered or chromed.

The Kelly 790 gives its light indirectly upwards and downwards and thus ensures both modern and classical architecture in a great atmosphere. For the Kelly 790 a high-voltage halogen fuel rod is used, whereas in the similar sister model Kelly 791 LEDs are used.
