### Description

The Vistosi Cloth AP G wall lamp has a lamp shade that looks like pleated fabric. In fact, it is made of mouth-blown crystal glass. The lamp shade is available in two colours: white matt and metallized. When switched off, the metallized shade appears metallic due to its chrome coating. As soon as the lamp is switched on, the colour changes to dark beige. While the white version emits light through the shade and upwards, the metallized version only emits light onto the wall. The Cloth AP G can be mounted upwards or downwards with the shade open, depending on where the light is to be emitted. The wall lamp can be operated with halogen lamps or LED retrofit lamps.
