### Description

The Serien Lighting Curling Ceiling new silver M has a diameter of 25 cm and is 10 cm high. This ceiling light is available with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. In the version with dim to warm function, the dimming behaviour of classic incandescent lamps, which is perceived as pleasant, is imitated during dimming. This means that the light not only becomes darker when dimmed down, but also changes its colour temperature. Thus, when dimming this version, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white.
