bulb exchange	on site itself
system performance	9 x 1 Watt
Total luminous flux in lm	675
Dimensions	H 2 x 60 + 2 x 75 + 2 x 105 + 3 x 135 cm

Description

The Catellani & Smith Syphasfera Set 9 consists of nine complete outdoor floor lamps, ready for connection, with all necessary accessories. The nine lamps can be easily linked and connected together using the Catellani & Smith Quick Connectors System. Only a single power supply is required for installation. The driver included in the scope of delivery is suitable for a maximum of 30 watts and can be dimmed on site. It has a connection cable for the power supply. All necessary plug connections are included. Included in the set:

- Two lamps with a height of 60 cm
- two lamps with a height of 75 cm
- two lamps with a height of 105 cm
- three lamps with a height of 135 cm
- an extension cable with a length of 500 cm
- a driver necessary for lamp operation.

The Syphasfera lamps each have a spherical glass with a diameter of 8 cm. The glass is available in clear or irregular structured. The light is emitted evenly in all directions through the clear glass. If the glass is irregular, light reflections are created on the glass when the lamp is switched on. Each lamp can be fixed up to 25 cm into the ground with its ground spike. The heights of the lamps (60 cm to 135 cm) are without ground spike.

With protection class IP44, the Syphasfera lamps are protected against splash water on all sides and solid foreign bodies with a diameter of 1 mm or more. With IP65 protection, the lamp rods are dust-tight and protected against strong jets of water from any angle. Driver and extension cables are protected against temporary immersion with IP67 protection. Other sets with three, four or five complete lamps are available from Syphasfera. A complete single lamp with a height of 60 cm, 75 cm, 105 cm or 135 cm is also offered.
