switchability	On the wall bracket
Power (max. Watt)	70 Watt
Shade diameter	23 cm
Shade height	17 cm
Arm length	35 + 35 cm
Wall mount dimensions	10 cm

Description

The Grupa Arigato Wall Double is a wall lamp with two rotatable and swivelling jointed arms. The two jointed arms can be adjusted separately so that the light can be redirected at any time. Each joint arm consists of two parts, each with a length of 35 cm. The two lamp shades can be rotated by 360 degrees and swivelled by 125 degrees. A diffuser is integrated at the bottom of the lamp shades, which ensures that the light is emitted downwards without glare.

The Arigato Wall Double can be connected via an included supply cable or directly to a wall connection. An on/off switch is integrated on the wall mounting. The Arigato Wall Double is available with a black or white matt powder-coated finish. It is also offered in other finishes on request. The lamp has two E27 sockets that can be operated with halogen lamps or LED retrofits. Grupa also offers wall lights from the series with one jointed arm in various lengths or with a simple light arm. In addition, the Arigato Wall Double Long Short is also available with two jointed arms whose parts are of different lengths.
