Description

The Catellani & Smith Ettorino T is a flexible table lamp, as its light can be directed to where it is needed at any time. Its arm with a projection of 73 cm can be tilted and swivelled. The table lamp can also be rotated 350 degrees around its own axis via a joint on the lamp base. The lamp head of the Ettorino T can be rotated and tilted. Depending on the setting, the lamp head of the table lamp has a height between 28 cm and 90 cm. Thanks to a patented process, the lamp remains stable in the set alignment.

The Ettorino T is offered by Catellani & Smith in the surfaces white, black and multicoloured. All lamps have a red human figure as a design element on the lamp arm. There is a dimmer on the supply line. The Ettorino T has an LED with a colour temperature of 2,700 Kelvin extra warm white.
