### Descripción

The Anglepoise Type 75 Mini Lamp with Wall Bracket is a wall lamp with flexibly adjustable arms. Thanks to tension spring technology, their arms can be readjusted at any time and remain in any selected position. The tension spring technology used in this lamp was already developed in the 1930s by industrial designer George Carwadine. The lamp shade of the wall lamp can also be swivelled and rotated. The Type 75 Mini Lamp with Wall Bracket is available in the surfaces slate grey, alpine white and jet black. In all versions, the wall bracket has the same surface as the lamp arms and shade. There is an on/off switch on the shade. LED retrofit or compact fluorescent lamps are suitable as light sources. A table base in the matching surface is included in the scope of delivery.
