### Descripción

The Vibia North 5605 floor lamp has two different sized lamp shades which emit the light directly downwards. The designer Arik Levy created with the North floor lamps very innovative and particularly flexible lamps. The two lamp arms are fixed at different angles to each other, the exact angle of the arms to each other can be set differently during installation. The height of the lamp shades can be adjusted afterwards if necessary. This floor lamp is available in the surfaces blue, black, white and beige. All surfaces are matt lacquered. The light can be mounted with or without plug. A dimmer button is integrated in the centre of the base.
