### Descripción

The Grupa Igram Wall is a wall lamp with two lamp arms that are positioned at a 90 degree angle to each other. The horizontal lamp arm can be swivelled by 180 degrees. Both lamp heads can be rotated by 180 degrees. This allows the light to be emitted directly into the room, to the side and / or onto the wall. Diffusers made of opal polymethyl methacrylate provide glare-free light. A touch dimmer is integrated at the end of the horizontal lamp arm. The Igram wall lamp is made of matt black, powder-coated steel. Two LEDs, each with a colour temperature of 2,700 Kelvin extra warm white, are integrated as illuminants. The lamp can be connected directly to a wall connection or via a provided supply cable.
