lámpara incluida	no

Descripción

The Spotzki vertical by the German luminaire manufacturer Lichtlauf can be mounted as a wall or ceiling lamp. This white lamp has a holder made of white metal and emits its light directly downwards. The Lichtlauf Spotzki vertical can be rotated by 180 degrees. This lamp is 16 cm high and has a diameter of 8.5 cm. The delivery of the light run lamp includes a surface-mounting box, which enables the rotatability of the lamp by 180 degrees. This lamp has a high-quality E27 ceramic socket and can be operated with reflector lamps. The ceramic socket is also suitable for other light sources with E27 base. The Spotzki vertical by Lichtlauf is available in the cable colours white, red and grey. The Spotzki is also available as an angled version. Cables in special colours are also available on request. The lamp is delivered without bulbs.
