## Descripción

The Knapstein ASTRA-40 has a curved metal cover with freely combinable outer structures. The height of this metal cover can be adjusted, making it easy to customise the light emission. The LED lamp offers an almost loss-free and glare-free light emission and allows flexible brightness control. The Knapstein ASTRA-40 emits indirect light, has a diameter of 40 cm and is 8.5 cm deep. This lamp can be mounted on the wall or ceiling. It is also possible to connect several ASTRA lamps together if an overlap is desired. The Knapstein ASTRA-40 is available in several surfaces and freely combinable external structures.
