

Holtkoetter

Supernova GT

Oberfläche

- aluminio
- latón
- platino
- negro
- blanco

Technical details

País de la Fabricación	 Alemania
fabricante	Holtkoetter
diseñador	Holtkötter
año	2023
Proyección en cm	56,5
material	Aluminium
ajuste de altura	altura ajustable
Potencia en vatios	16 W
LED #	inclusive
Indice de reproduccion cromatica	>90
El flujo luminoso en lm	2500
Temperatura de color en grados Kelvin	2.200-2.850
protección	IP20
Volumen de suministro	LED
Atenuación	Toque atenuadores en la base de la lampara
Dimensiones del soporte de la lámpara	18 cm
cabeza del alumbrado masa	18 cm
reemplazo de la bombilla:	en el fabricante / en la fabrica

Descripción

With 2500 lumens and a colour rendering index of >90, the Holtkötter Supernova GT leaves nothing to be desired in terms of the light emitted. The lamp head, which can be rotated and swivelled in any direction, allows the light to be directed in any direction. The light rod of the Holtkötter Supernova GT can also be tilted by 15° - 60°. The touch dimmer with memory function on the base of the lamp allows the brightness to be continuously adjusted. When dimming, the light colour of the integrated LEDs changes to a warmer tone (from 2,850 Kelvin warm white to 2,200 Kelvin warm white) thanks to dim-to-warm technology. If necessary, the LEDs can be replaced by the manufacturer. The Holtkötter Supernova GT is available in matt aluminium, anodised brass, platinum, white and black. In the anodised brass model, the luminaire rod is black; in all other models, the lamp rod and luminaire head have the same finish.
