### Description

The Holtkötter Janus E ceiling lamp offers powerful light with 2,700 and a color rendering index of over 90, which is emitted directly or indirectly as desired. The lamp arm attached to the side of the rectangular canopy can be swiveled up to 180°. The lamp head, which can be continuously rotated and swiveled in all directions and contains a replaceable LED board, allows the light to be individually aligned. When dimming, the light color of the integrated LED changes to a warmer tone thanks to the dim-to-warm technology (from 2,850 Kelvin warm white to 2,200 Kelvin warm white). The maximum projection of the Janus E ceiling light is 42 cm. The ceiling canopy is 22.5 cm long, 6.2 cm wide and 3.6 cm high. The Janus E from the German manufacturer Holtkötter is available in the following surface structures: matt aluminum, black/anodized brass and black.
