### Description

The Vibia Puck 5400 is both suitable for use as wall lamp or as a ceiling light made of white satin and triple blown opal glass. Aptly named for its 5400 form that is similar with a little imagination of a puck. Due to the moderate size of 16 cm diameter and 6 cm depth the puck is 5400 particularly versatile. It is also conceivable that several lights of this variation can be used.
