The Vibia Origami 4506 is a wall lamp and can be used for indoor lighting, but also suitable with the protection class IP65 (spray water- and dustproof) for outdoor use. It was named so because it looks like a work of art that is created solely by folding paper. The lamp, however, is not made of paper but of ABS and polycarbonate. It is available in white, terra dark, green or brown. The design was created by Ramón Esteve.

Even as a single lamp it's a real eye-catcher, but particularly in combination with several lights of the same kind a work of art on the wall is produced. Any combinations are possible. As bulbs three modern LEDs are included. The wall lamp can be dimmed on site with a trailing edge phase dimmer. To a wall terminal up to 30 modules can be connected. For larger compositions ask us for a special connection system. If you need help in configuring your personal wall art combination, please contact also us.
