### Description

The Las 376 of Oluce was created in 2015 by the designer team Mist-o. The floor lamp is made of individual horizontal and vertical bars which have been placed on one another in a multi-dimensional form. The height is 177 cm, the projection is 50 cm. The aluminum structure was cut out with a laser, the reflectors are made of metal. The diffusers are made of satin transparent polymethylmethacrylate.

The Las 376 has three integrated LEDs with each 18 watts of power. Two LED light sources emit their light upwards to create diffuse, indirect light and one emits light downwards. The indirect uplight can be switched separately from the downlight. The two surfaces matt black and black grey are offered.
