Description

The Licht im Raum Ocular Spot 2 Zoom has two spotlights with traversable lenses, which can also be zoomed in and out. In this way, the angle of radiation can be varied as desired between 30 and 60 degrees. With a smaller value for the beam angle, the light cone becomes narrower; with a larger value, it becomes wider.

The ceiling and wall spotlamp is made of stainless steel and is available in the surfaces polished or matt nickel plated.
