### Description

The Vibia Mayfair 5505 table lamp emits most of its light directly downwards. A small part of the light is also emitted indirectly upwards. This lamp has an opaque shade, and the Mayfair 5500 from this series is also available with a translucent shade.

The Mayfair 5500 is available in four surfaces: graphite grey matt lacquered, gold satin matt, white matt lacquered and copper satinised. The table lamp can be dimmed by means of an optical sensor on the base of the lamp. It is switched on or off by briefly touching the sensor. Touching the sensor for a longer time increases the light intensity, touching it again reduces it.
