#### Description

The Serien Lighting Curling Suspension Rope Acryl clear / cylindrical opal S can be individually configured in its total height between 15 cm and 195 cm during installation. This Curling suspension lamp has a shade made of clear acrylic glass and a cylindrical reflector. The light is directed downwards and softly diffused all around by the reflector.

The pendant light Curling Suspension Rope Acryl clear / cylindrical opal S is available with a colour temperature of 2.700 Kelvin extra warm white, 3.000 Kelvin warm white or with Dim to warm function. The version with dim to warm function imitates the dimming behaviour of classic incandescent lamps, which is perceived as pleasant. Here, when dimmed down, the light not only becomes darker but also changes its colour temperature. Thus, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white when dimmed. The Curling acrylic lamp with steel cables is also available with a lamp shade that has a diameter of 22 cm.
