Description

The Knapstein SVEA-40 is a ring-shaped pendant lamp with a diameter of 40 cm. The lamp emits its light simultaneously upwards and downwards. The uplight and downlight can be switched separately by gesture control and can also be dimmed continuously. The sensor area for gesture control is located at the top and bottom of the lamp. The light is switched on or off with a wiping hand movement in the sensor area. To dim the lamp continuously, hold your hand in the sensor area for a longer period of time. The luminous intensity set for uplight or downlight is saved by the memory function and automatically readjusted the next time the light is switched on.

The SVEA-40 is available in nickel-plated matt surface. The pendant lamp by Knapstein is height-determinable between 30 cm and 250 cm with the stop sleeves on the underside of the ceiling canopy. By pushing in the stop sleeves on the ceiling canopy, the cables of the lamp can be pushed or pulled into the desired position. From the series, the SVEA-L40 is also offered with a stepless height adjustment by pulling or lifting the lamp itself. The lamp is also available with a diameter of 60 cm or 80 cm. On request, the SVEA is also offered in other lengths or surfaces.
