### Description

The Foscarini Gioia wall lamp has a transparent element in polymethyl methacrylate with a diameter of 40 cm. An irregular element of white marble is attached to this. The LED light source is mounted on the wall behind the two elements and emits its light into the room through the transparent element. This creates a halo effect around the lamp on the wall. Both elements are freely movable. The Gioia is meant to symbolize the encounter between two worlds: the world of the past with its marble statues and the world of the present with its modern materials. The Gioia is available with a transparent element in blue, green and pink versions. The wall lamp is supplied with a grey plug lead with on/off switch. If necessary, the plug lead can be removed for wall mounting on the direct power connection. The wall light can be dimmed on site with a trailing edge phase dimmer. The series also includes the Gioia Grande with a total diameter of 68 cm.
