Technical details

Pays de fabrication	 Espagne
fabricant	Marset
concepteur	Jordi Canudas
année	2019
protection	IP20
Contenu de la livraison	LED
matériel	verre
atténuation	Variateur à pied
Puissance en Watt	3,5 W
LED	y compris
Indice de rendu des couleurs	90
Flux lumineux en lm	216
La température de couleur en Kelvin	2.700 extra blanc chaud
Diamètre de l'ombre	13 cm
Pied de lampe dimensions	6 cm
Dimensions	H 22 cm

Description

The Marset Dipping Light Portable is a table lamp with a rechargeable battery and can be operated wirelessly. It can be charged using the USB cable supplied. Depending on the brightness setting, the battery lasts between five and twenty hours. The Dipping Light Portable has a 3-step dimmer on the base of the lamp. The lamp can be dimmed in three brightness levels (25%, 50% or 100% brightness) by briefly pressing the dimmer several times. Pressing it again briefly switches the battery-powered lamp off. Pressing the dimmer continuously sets immediately the maximum brightness level.

The Dipping Light Portable has a lamp shade with several layers of colour. The lamp shade is made of hand-blown glass and has a diameter of 12.5 cm. The colour layers of the lamp shade change the colour of the light emitted. Even when switched off, the layers of colour arranged in concentric circles are clearly visible. The battery-powered lamp is available with a lamp shade in the surfaces white, blue, green, pink and amber. The total height of the lamp is 22.2 cm. The cylindrical lamp base is available in brushed brass. An LED is included as illuminant. A disc with magnet and a magnet are offered as accessories. The disc with magnet can be slid under a tablecloth, for example, to fix the battery-powered lamp on table surfaces. With the magnet the lamp can be fixed on metal surfaces.
