Omschrijving

The Foscarini Magneto Terra is a floor lamp with modern LED technology. Particularly interesting and flexible is the Magneto Terra by the magnet, which gave the light its name.

This magnet can be attached at different locations of the lamp rod. By this turn of the lamp head is fixed and can be brought over and over again in various positions. So both the light and the optics of light can be re-adjusted again and again for any current needs.

It was designed by Giulio Iacchetti with a lamp body made of painted steel and ABS in 2011. The Magneto Terra is available by Foscarini in white or black. A 5 Watt LED 2700 ° Kelvin is included.
