### Omschrijving

The Vibia Set 7761 was designed by Xuclà and is available by Vibia in the surfaces white matt and mink-matt. As a single lamp, the Set 7761 already convinces, but in combination with other lights Set it gets an even better advantage. Then fascinating light objects arise on the wall.

The Set 7761 is a combination of a single LED wall light and two mobile, reflecting elements. At the bottom of the lamp a modern LED is housed which radiates its light upwards. The two upper parts of the Set 7761 can be pivoted about 360°. So the light of the lower part can always derive differently and there is a fascinating game of light and shadow. The LED is on site dimmable at 0-10 volts. As standard, this lamp has a colour temperature of 2,700 Kelvin extra warm white; on request, it is also available with 3,000 Kelvin warm white or 4,000 Kelvin white.
