### Omschrijving

The Oluce Pascal 345 floor lamp is designed by Vico Magistretti in 1983. It consists of two aluminum shades, which can be switched separately. The upper shade with an integrated LED light source emits its light indirectly to the ceiling. At the same time, the lower shade with two E27 lamps illuminates the upper shade so that a part of the light is also reflected into the room and downwards.

The Oluce Pascal 345 is completely in anodized bronze. The lamp base is made of painted metal.
