

Marset

Theia P

Oberfläche

- zwart
- wit

Technical details

Land van fabricage	 Spanje
fabrikant	Marset
ontwerper	Mathias Hahn
jaar	2016
bescherming	IP20
Omvang van de levering	LED
materiaal	aluminium, metaal, methacrylaat
kabel kleur	zwart
kabellengte	200 cm
dimmen	Touch Dimmer op de lampkop
Wattage	11,3 W
LED	inclusief
Kleurweergave-index	90
Lichtstroom in lm	1.019
Kleurtemperatuur in Kelvin	2.700 extra warm wit
Schaduw diameter	32 cm
kandelaar Dimensions	30 cm
Dimensions	H 116 cm

Omschrijving

The Marset Theia P floor lamp has a rotating lamp shade. This shade consists of two hemispheres, one vertical and one horizontal, which partly overlap each other. The vertically fixed hemisphere is white on the inside, and white or black on the outside. In the corresponding surface are also the light rod and the light base. This hemisphere is made of painted metal. The horizontal hemisphere is made of thermoformed smoked glass methacrylate. The complete shade can be rotated around its own axis via a handle on the light rod. The light is emitted by an LED in a hemispherical element in the centre of the shade onto the white inside of the vertical hemisphere and reflected from there. The lamp shade can be aligned so that the floor lamp can be used as a reading lamp or to create indirect lighting on the wall or an object. The Theia P can be switched and dimmed by pressing a push button dimmer on the lamp head.
