Omschrijving

The B.Lux Speers S1/L emits its light directly downwards. An integrated glass lens focuses the emitted light and distributes it evenly downwards. The pendant lamp is suspended with a 400 cm long cable and is therefore also suitable for high ceilings. During installation, the lamp can be individually set in height.

The Speers S1/L is offered in the surfaces black or white. Its lamp shade is made of aluminum and is characterised by a matt texture. The pendant lamp is operated with a dimmable LED that has a colour temperature of 2,700 Kelvin extra warm white.
