Omschrijving

The Catellani & Smith Ettore F floor lamp can be flexibly oriented. This allows the light to be directed exactly where it is needed. The lamp arm has a projection of 73 cm and can be individually tilted. Via a joint on the upper part of the lamp rod, the lamp arm can additionally be rotated 350 degrees around its own axis. The lamp head of the Ettore F can be rotated and tilted. Depending on how the floor lamp is oriented, the lamp head has a height between 103 cm and 165 cm. Thanks to a patented process, the lamp always retains the set position.

The Ettore F is available in the surfaces white, black and multicoloured. On the lamp arm, the floor lamp has a small, red, human figure as a design element. The lamp can be switched and dimmed continuously via a push button dimmer on the lamp rod. The integrated LED has a colour temperature of 2,700 Kelvin extra warm white.
