Opis

The Vibia Fold Surface 4200 is a wall mounting light. The complete lamp consists of a single lamp element with two LED light sources. This light element has a width of 22 cm as well as a height of 18 cm. The design was created by Arik Levy, who designed the Fold Surface 4200 as a lamp made of aluminum. The light is available in off-white, brown and green. All surfaces are matt lacquered. Two efficient 2.1 Watt LEDs are integrated as light sources. Particularly in combination with the many other Fold lamps, different light compositions can be created on the wall.
