Opis

The Vibia Set 7763 creates a fascinating game of light and shadow on the wall. The lamp is a combination of a single-lamp LED wall light and four mobile reflective elements in different lengths. At the bottom of the lamp a modern LED is housed, which radiates its light upwards. The four upper parts of the Set 7763 can be pivoted about 360°. So the light of the lower part is guided always differently.

The Vibia Set 7763 is designed by Xuclà and is offered by Vibia in the surfaces white matt and mink-matt. As a single light the Set 7763 already produces a very nice picture on the wall. But in combination with other Set lights it convinces more. Then fascinating light objects arise on the wall. In Set 7763 a LED is included. The wall light can be dimmed on site at 0-10 volts. As standard, this lamp has a colour temperature of 2,700 Kelvin extra warm white; on request, it is also available with 3,000 Kelvin warm white or 4,000 Kelvin white.
