Opis

The Foscarini Tress Terra grande LED is a floor light with a height of 195 cm and a diameter of 25 cm at the top. Below it has the diameter of 20 cm, so it looks like a pillar. As materials fiberglass, painted metal and aluminum were chosen, one braid-like structure was created with holes through which the light shines outwards. At the same time light is emitted upwards.

For Tress Terra grande LED these surfaces are available: greige (grey-beige), black and white. The upper and the lower light source can be operated separately via a switch on the supply line. In addition, a cord dimmer to regulate the light intensity is present. As a designer, Marc Sadler is responsible, he also created several other Tress models for Foscarini except this light.
