### Opis

The Luceplan Curl is a table lamp with an integrated LED. The LED emits its light on the inside of the curved body, where it is reflected. The shape of the lamp base allows a different alignment and rotating of the lamp body. As a result, the light can also be adjusted at will.

The light can be dimmed via a switch in the center of the lamp base. The table light has a reflector in a mirror surface. Glare-free light is emitted. Sebastian Bergne designed the Luceplan light in the year 2012.
