Opis

The Vibia Mayfair 5500 is a table lamp with a translucent shade. The largest part of the light is emitted directly downwards, only a small part is also directed into the room and indirectly upwards. In addition to this lamp with a translucent shade, the Mayfair 5505, a table lamp with an opaque shade, is also offered from this series.

The Mayfair 5500 is available in two surfaces for the lamp shade: green and orange. The rod and base of both versions are in graphite grey. The table lamp is dimmed via an optical sensor on the lamp base. The table lamp is switched on and off by briefly touching the sensor. Touching it for a longer period increases the luminous intensity, touching it again for a longer period reduces it.
