Casambi Phase-Cut Dimmer module

Technical details

Kraj produkcji  Włochy
producent Stilnovo

Opis

The Stilnovo Casambi Phase Cut Dimmer module is used to regulate LEDs via an app for your smartphone or tablet (IOS, Android) via Bluetooth. With the free Casambi App, LED lights can be steplessly controlled in brightness. In addition, individual lighting scenarios can be set.

New lamps are automatically detected. An additional gateway is not required. The Casambi App functions as a user interface, commissioning tool and remote gateway. The Casambi module can also be controlled via existing light switches.
