Opis

This Mawa Glaskugelleuchte LED has a mouth-blown, clear glass with a diameter of 30 cm. Through the glass, the light is emitted homogeneously in all directions. Each glass is elaborately handmade from clear crystal glass and consists of three layers. Possible small bubbles or slight deviations in size and glass thickness are signs of craftsmanship.

The Glaskugelleuchte LED is offered with an aluminum mounting in white matt, black matt and grey-metallic. The canopy is always in the same colour as the mounting. The integrated LED can be dimmed by the customer with trailing edge and leading edge phase dimmers. It is offered with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or 4,000 Kelvin white. DALI, 1-10 Volt, Push or Bluetooth dimmable versions are also available on request.

The Glaskugelleuchte LED has a beam angle of 38 degrees. The cable has a maximum length of 250 cm and can be shortened if necessary.
