## Opis

The LDM Big Wyng Cube is an elongated, oval pendant lamp with a length of 150 cm. Its lamp shade is 55 cm wide and consists of transparent acrylic glass. It is printed on one side with a precise square pattern as a screen-printed motif.

**The displayed image shows the product with dot pattern instead of square pattern.**

The Big Wyng Cube is operated with two integrated LEDs. Its lamp shade can be mounted in two ways: with the primary light distribution downwards or upwards. If the lamp is suspended with the square pattern facing upwards, it emits 80 % of its light downwards. The remaining amount of light is emitted upwards through the screen print. When the lamp is suspended with the square screen-printed motif facing downwards, it distributes the greater part of its light upwards.

The Big Wyng Cube is available with a suspension of the lamp shade in the surfaces white, silver metallic and bronze. The canopy is always in the same colour as the suspension. The pendant lamp is offered in two versions: dimmable on site with a trailing edge and / or leading edge phase dimmer or with an integrated Casambi module. With a Casambi module, the lamp can be operated via smartphone or tablet using the Casambi app via Bluetooth. Casambi technology also offers the possibility of regulating several suitable lamps in groups. The lamp is also available DALI dimmable on request.

As standard, the Big Wyng Cube has a maximum total height of 120 cm. The two cables can be shortened if necessary; they are also available with special lengths on request. LDM also offers the lamp as Big Wyng Dot with a dot pattern on the acrylic glass.
