Opis

The Knapstein TESSA-S LED floor lamp is equipped with a sensor dimmer that can be used to switch the lamp, dim it continuously and change the light colour. The sensor is located on the underside of the light source. Simply swipe the sensor to switch the TESSA-S floor lamp on or off. The light colour of the lamp can be adjusted to a warmer tone (from a colour temperature of 3,500 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved using the memory function and automatically reset the next time the light is switched on. This flexibly adjustable floor lamp has a ball joint at the base. An additional swivelling and tilting joint on the luminaire arm and reflector ensures precise alignment of the light. This lamp also has a white acrylic cover with a lateral light edge. The Knapstein TESSA-S is available in various surfaces.
